SOLIUS®

Wall hanging system instructions

The Solius Pro Wall Hanging System is a secure, wall-fixed alternative to the over-door hanging solution. The Solius device attaches to the wall hanger the same way it attaches to the door hook via the hanging clip and strap assembly. These instructions cover wall placement only. For all therapy instructions, refer to the Solius® Pro User Manual at **Solius.com/user-manual**.

What is in the box

Included in this package

- Wall hanging system with adjustable hanging hook
- 2 drywall anchors with #8 screws

Not included - you must provide

- Stud finder (depending on wall type and desired mounting location)
- Level (recommended)
- Screwdriver or drill with appropriate driver bit for wall type
- Step stool/ladder

Safety Requirements

Placement:

- Do not place in high-traffic areas, doorway swing paths, or areas frequented by children or pets.
- Hang where a falling device would not injure anyone or damage property.
- Mount the hanger holes at 8 feet from the floor to accommodate users of various heights.
- Manage the power cord to prevent tripping. Do not allow the cord to hang loosely across a walkway.
- Avoid direct sunlight, moisture, or pests.

Before each therapy session:

- Inspect the hanger and fasteners for loosening or damage.
- Do not use if the hanger is loose, cracked, or deformed. Contact Solius Customer Service.

WARNING: If you cannot safely reach the mounting location, use a sturdy, non-slip step stool with a wide base. Do not stand on chairs or other unstable surfaces.

WARNING: Do not modify the wall hanging hardware. Solius is not responsible for injury or damage resulting from hanging errors or use of non-included fasteners.

WARNING: Before drilling, ensure the mounting location is free of electrical wiring, plumbing, and other concealed objects within the wall.

1 Choose your location

Select a wall near an outlet, within reach of the 10-foot power cord, where the panel hangs free of obstructions.

2 Mark and prepare the mounting holes

Hold the hanger flat against the wall in the intended position, with the mounting holes at 8 feet from the floor. Use a level to ensure the hanger is straight. Mark both hole centers through the holes.

3 Place fasteners

Screw the drywall anchors into the wall at the marked holes using a screwdriver or drill. Hold the hanger over the anchors and drive both screws through the hanger into the anchors until secure. Do not overtighten.

4 Hang the Solius Light Panel

Adjust the hanging clip to eye level by sliding it along the hanging strap. Place the Solius Light Panel's hanging cord onto the hanging clip. Seat the black centering bracket on the clip so the panel hangs centered. The wall hanger accessory replaces the over-door hook; all other setup steps are the same as those in the Solius® Pro User Manual.

5 Connect to power and proceed with therapy

Plug the power cord into a nearby outlet. Follow all remaining setup and therapy instructions in the Solius® Pro User Manual. No changes to the mobile app or therapy workflow are required.
