

Discover Personalized UVB Light Therapy

Solius is the only FDA-cleared personalized UVB light therapy device that analyzes your unique skin tone to deliver a precise, optimal dose of UVB light, activating the natural health benefits of the sun with less than 1% of the total UV risk.

FDA-cleared

Personalized dosing

Quick weekly therapy

Safe sun technology

Clinically proven

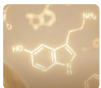

Novel UVB light spectrum

How UVB light works throughout your body

Activation of neurotransmitters, nitric oxide & hormones

These molecules improve mood, energy, stress balance, motor control, and provide long-term neuroprotection against cognitive decline.

Production of vitamin D

Vitamin D functions as a hormone that influences over 1,000 genes, supporting bone strength, immune resilience, and metabolic health.

Balancing of the microbiome

A balanced microbiome improves skin health and appearance, reduces chronic inflammation and supports digestion, immunity, and mood regulation.

Solius light therapy safely delivers 12x the UVB light health benefits of the sun with automatic dosing personalized for your skin tone.
